

# TEACHERS!

Print the following letter and send it home with your students so that they can enjoy playing Kakooma at home!

Dear Parents,

I'm thrilled to tell you about a fantastic new educational game I've discovered in class to get students excited about learning math.

It's called KAKOOMA, and it's an engaging, deceptively simple game that turns learning into play. Kids race against the clock as they exercise math skills to solve the game's unique puzzle-in-a-puzzle format. They wind up having so much fun, they don't even realize they're building skills!

Your child can continue learning with KAKOOMA at home when you order an online subscription for a one-time price of only \$5.95.

The online subscription includes:

Unlimited puzzles

3 Operations: Addition, Negative Numbers and Times Table

30 Replayable game levels for math students of all abilities

I encourage you go to [KAKOOMA.COM](https://www.kakooma.com) and take a look! It is a great value - and a great way to encourage a love for math that just might last a lifetime.

Sincerely,

Your Child's Teacher
